# Uncovering Value in Alliances, PPP and D&C Contracts

Join the first of the Australian Cost Engineering Society  
Victoria's 2019 seminars, themed "Valuable Engineering".

6pm, Tuesday 19 March 2019

Engineers Australia, Level 31, 600 Bourke Street,  
Melbourne

Are we getting value from the current types of contract we are using? What is their track record? What is the best value for money approach – collaborative vs adversarial? What is the risk/reward balance? Is it the form of contract or is it the calibre of people on the team?

Hear from industry leaders as they answer these questions and more, describing the advantages and disadvantages of three types of contract from an owner and contractor perspective.

Please meet at 6.00 pm for a 6.30 pm start.
